

SocInfo 2016

November 14-17

Bellevue, WA

The 8th International Conference on Social Informatics offers an interdisciplinary venue for researchers from Computer Science, Informatics, Social Sciences and Management Sciences to present original research work on the interplay between socially-centric technologies and social phenomena. SocInfo aims to help researchers from the computational and social sciences share insights and methodologies, while forging common research agendas that bridge traditional disciplinary boundaries. The organizers welcome a broad range of submissions, from those that apply methods from the social sciences to the study of socio-technical systems, to the application of computational methods to the study of complex social processes, to the use of social concepts in the design of information systems.

Confirmed Keynote Speakers

Joshua Blumenstock (UC Berkeley)

Meeyoung Cha (KAIST & Facebook)

Tina Eliassi-Rad (Northeastern)

Adam Russell (DARPA)

Matthew Salganik (Princeton)

Hanna Wallach (Microsoft Research and UMass)

Paper Submission Deadline: July 27

Notification: August 20

Conference Dates: November 14 - 17
